MISSOURI TECHNOLOGY EDUCATION GUIDE 2002 v. 2.1

Acknowledgments, Credits

Chapter 1 **Technology Education in Missouri**
1. Introduction
2. Definitions and Terms
    a. Technology Education
    b. Technology
    c. Technological Literacy
3. Philosophy of Technology Education
    a. Technology and Industry
    b. Social Context
    c. Technology as a Force has Affected Our Lives
    d. Implications for Education
    e. TE's Relationship to Vocational and General Education
    f. The Profession's Name
    g. Content
4. Mission and Goals of Technology Education

Chapter 2 **National Technology Content Standards & Show-Me State Standards**
1. Introduction: What are Standards?
2. Who Developed Standards?
3. Technology Education
    a. Standards for Technological Literacy: Content for the Study of Technology
    b. Why are Technology Content Standards (TCS) Important?
    c. The ITEA offers five guiding principles behind the Technology Content Standards:
    d. Who is a technologically literate person?
4. Missouri Show-Me Standards
5. Crosswalk Between the Missouri Show-Me Standards and the Technology Content Standards

Chapter 3 **Scope & Sequence of Technology Education Programs**
Acknowledgements
Executive Summary
1. Rationale for Technology Education in Missouri
    A. Introduction
    B. Definitions and Terms
    C. Philosophy of Technology Education
    D. Technology and Impacts on Daily Life as a Force
    E. Technology and Social context
    F. Technology and Industry
    G. Implications for Education
    H. Technology education's Relationship to Career and General

Education
I. Content of Technology Education
J. Mission and Goals of Technology Education
2. Scope & Sequence
A. Pre-Engineering Program
a. Project Lead the Way© Course Descriptions & Sequence
b. Gateway to Technology
c. Principles of Engineering
d. Introduction to Engineering
e. Digital Electronics
f. Computer Integrated Manufacturing
g. Engineering Design and Development
B. Exploring Technology Careers Program
a. Invention & Innovation
b. Exploring Technology Careers A & B
c. Exploring Architecture & Construction
d. Exploring Communications Technology
e. Exploring Engineering
f. Exploring Information Technology
g. Exploring Manufacturing
h. Exploring Transportation & Distribution
C. Industrial Technology Program
a. Introduction to Technology
b. Exploration of Industrial Technology
c. Introduction to Communication Technology
d. Energy & Power Technology
e. Introduction to Materials & Processing
3. Appendices
4. Preferences

Chapter 4 Elementary School Technology Education Model Curriculum
1. Introduction
2. Why Should Elementary Students Study Technology?

Chapter 5 Teaching Technology at the Middle School Level
1. Introduction
2. Curriculum Thrust: Exploration & Engagement
3. Suggested Course Titles and Descriptions
4. Nature of the Learner
5. Transforming the Middle School Education
6. Career and Educational Exploration
7. Changing Emphasis in Teaching Education
8. Documenting Student Achievement of Content Standards Across Grade Levels
9. Methods: Strategies for Standards-based Instruction
Method 1 – Using Design Briefs to Challenge Problem Solvers
Definitions
Getting Students Started with Design Briefs
Content Examples

General Steps in the Design Process
Sample Design Brief Statements
Components of a Design Brief
Helping Students Write Design Briefs
Method 2 – Teaching Students to Assess the Impact of Technology
Definitions
Getting Started
Basic Steps for Assessment
Method 3 – Cooperative Learning, Teamwork, and Leadership
Overview
Definitions
Getting Started
Student Rules and Expectations
Method 4 – Assisting Students with Special Needs
Overview
Definitions
Involvement in Individualized Education Program Planning
Techniques for Diverse Learning Styles
Method 5 – Enhancing Creative Thinking
Overview
Definitions
Creating an Idea-Friendly Laboratory-Classroom
Method 6-Sharing, Reporting, and Recording Information
Overview
Definitions
Getting Started
Recording Student Progress in Portfolios or Logs
Contents for Design Portfolio or Log
Format Resources
Method 7-Using Simulations to Teach Technology
Overview
Definitions
Benefits of Using Simulations
Samples of Simulations
Method 8-Using Concept Maps ™ to Facilitate Learning
Overview
Definitions
Getting Started
Sample Concept Map
Helping Students Develop Concept Maps
Method 9-Standards-Based Student Assessment
Overview
Definitions
Benefits of Standards-Based Assessment
Getting Started
Assessing Learning in Problem-Solving
An Example of a Scoring Guide
Method 10-Engaging Community and Corporate Partnerships

Overview
Definitions
Resources a School May Give
Resources a School May Receive
Method 11-Using Modular Instruction
Overview
Definitions
Getting Started Using Modular Instruction
Modifying a Module
Using Modules to Their Fullest Potential

Chapter 6 High School Technology Education Model Curriculum
1. Introduction
2. Recommended High School Curriculum
3. Foundations of Technology: Scope and Sequence
   Introduction
   High School Curriculum Scope
   Instructional Methods
   Assessing Students
   Unit Framework
4. Foundations of Technology: Units of Instruction
   Overview

Chapter 7 Technology Student Association (TSA)
1. Introduction
2. Why Have a TSA Chapter?
3. About TSA
   Purpose and Philosophy
   How TSA Develops Students
   Leadership Development Program
   Competitive Events
   Technology Achievement Program
   National Service Project
4. Mission
5. Goals of Technology Education
6. There are Many Benefits to Having a TSA Chapter
7. Official Charter Information
8. Starting a TSA Chapter
9. Ten Steps to Starting a TSA Chapter
10. Curriculum Event Information
11. TSA's History
12. TSA Publications Online

Chapter 8 Teaching Technology Education
1. Introduction
2. Planning Instruction
    a. Principles of Learning
    b. Tischler's Thoughts on Learning
    c. Sampling of Teaching Methods
3. Selecting Instructional Methods
4. Meeting Students' Individual & Special Needs
    a. Identifying Special Needs Learners
    b. Learner Characteristics
    c. Accommodating Special Needs Students in the TE Program
5. Providing for Equity
6. Evaluation Student Performance
    a. Purposes of Student Evaluation
    b. Pre-testing
    c. Evaluation Techniques
7. The Career and Technical Student Organization (CTSO)
    Carl D. Perkins Vocational and Technical Education Act of 1998
    Vocational Educational Act of 1963
    Public Law B1-740 (1950)
    "George Acts"
    Smith-Hughes Act (1918)
    Bibliography
8. Developing Employability Skills

Chapter 9 Organizing & Managing the Technology Education Program
1. Introduction
    Overview
2. Accessing Key Resource Personnel
    DESE Personnel
    University Faculty
    Business & Industry Personnel & Associations
    Government & Education Association Personnel
    School Administration
3. Using Available Support Systems
    Missouri Department of Elementary and Secondary Education
    Guidance Support
4. Using Advisory Committees
    National Technology Education Advisory Council
    Local TE Advisory Committees
    Local TE Advisory Committee Membership
    Local TE Advisory Committee Operations
    The School's Responsibility to Committee Members

Chapter 10 Technology Education Program Evaluation
1. Introduction

2. Local (internal) Evaluation
3. School Accreditation
4. State (DESE) Evaluation
5. Program Planning Quality Control
6. Linking the Technology Education Program to Missouri's Show-Me Standards
7. Follow-up Evaluations with Former Students
8. Missouri School Improvement Program
9. Missouri Technology Education Program Standards
10. National Technology Education Program Standards

Chapter 11 Professional Development
1. Introduction
2. Definition of Professional Development
3. The Continuous Nature of Professional Development
4. Professional Development Standards
    a. Knowledge-ability base
    b. Students
    c. Curriculum
    d. Instructional Strategies
    e. Learning Environment
    f. Teacher Responsibilities
    g. Educational System Responsibilities
5. Evaluating TE Teacher Effectiveness
6. Performance-Based Evaluation

Bibliography

Chapter 12 The Technology Education Safety Program
1. Introduction
    Overview
2. Missouri Specifications
    Liability of the State
    Liability of School Districts
    OSHA, Right to Know and Missouri
    Missouri Eye Safety Law
    Good Samaritan Law
    Administrative Guidelines for School Safety
    Missouri Hazardous Waste Management Law, Sections 260.350 – 260.433, RSMo
3. Safety Responsibilities
    Local Board of Education Responsibilities
    Teacher Responsibilities
4. Liability & Negligence
    Instructor Liability
    Teacher Vulnerability
    Negligence
    Guidelines for Enforcing Safety Rules and Disciplines
    Conclusion – Liability Vulnerability
    Protection from Litigation

5. Safety Instruction
    - Content and Organization
    - Suggested Instructional Techniques: General
    - Suggested Procedures to Ensure Special Needs Students Safety
6. Safety Evaluation
    - Safety Test Criterion Levels
7. Record Keeping
    - Hazardous Condition Report
    - Safety Instruction Acknowledgement
    - Accident Reports
    - Reporting Summary
8. Emergencies
    - First Aid & CPR
    - Treatment of Injuries
    - Steps to Follow When an Accident Does Happen
    - District Emergency Procedures (Fire, Severe Weather/Tornado, Earthquake)
9. Organization & Approval of the Overall Safety Program
    - Safety Approval Procedures
10. Facility Specifics
    - Facility Color
    - Floors
    - Noise
11. Fire Safety
    - Ventilation
    - Eye Safety
    - Sanitizing Protective Eyewear
    - Sharps/Infection Safety
    - Disposing Hazardous Materials in Missouri
    - Materials Safety Data Sheets
    - Inspections
    - Reasons for Inspections
    - Electrical Safety

Chapter 13 Planning Technology Education Facilities

1. Introduction
2. Background Information
    - Curriculum Changes Mean Changing Environment
    - Trends in Technology Education Facility Design and Equipment
    - Types of Space Needed to Deliver Technology Education
    - Technology Education Facilities
    - Comprehensive Laboratories
    - Cluster Laboratories
    - Modular Laboratories
3. Updating Existing Facilities
    - Reorganization
    - Renovation
4. Space Management
5. Planning New Facilities

Overview of the Process
Developing a Facility Design Portfolio
6. Determining Design Criteria
Space Characteristics
Flexibility of Space
Utilities
Aesthetics
Accessibility to the Handicapped
Control/Supervision
Laboratory Security
Safety
Noise Level and Control
Environmental Control
Equipment
Furnishings
Lighting Considerations
7. Educational Specifications
Philosophy
Instructional Program
Space Needs
Auxiliary Spaces
Space Relationships
Equipment Layout
Construction Factors
8. Interacting with the Architect
9. Equipping the Program
Acquisition and Installation of Equipment
Environmental Considerations
Evaluation and Modification of Equipment and Facilities
Funding Sources
10. Maintaining Laboratory Equipment

Chapter 14 Resources
1. Web – based Resources
Central Missouri State University
Missouri Division of Vocational and Adult Education
International Technology Education Association
Missouri Association for Career and Technical Education
Association for Career and Technical Education
Technology Education Association of Missouri

Chapter 15 Glossary

This *Guide*, as was its predecessor, is dedicated to the improvement of Technology Education in the state of Missouri and to all of the dedicated professional teachers who work hard at this challenge each and every day. This *Guide* is a revision and a "streamline" of the 1991 *Guide*. As such, this *Guide*:

- Is intended to be the state's primary resource for planning, implementing and evaluating technology education,
- Is further intended to provide guidelines for organizing, instructing, and managing such programs, and
- Is also designed to help direct technology educators to references where they can find additional information and assistance.

The *Guide* should meet the needs of teachers and administrators by presenting highlights of the best thinking and practice. With the talents and efforts of Missouri's many practitioners, and the suggestions contained in this *Guide*, we look forward to the creation of a broad base of exemplary programs that will help Missouri's youth learn much about their technological world.

Acknowledgements

The project staff recognizes the hard work and dedication the many professional educators around the state of Missouri have given to this project. The many hours of review of the 1991 edition of the Missouri Technology Education Guide and the expert feedback contributed to this revised 2002 Guide. The very hard work completed by the 1991 Guide team remains a standard bearer. This guide is an enhancement of the 1991 Guide and reorganizes the volume of work accomplished in the previous guide. Therefore, we owe a great deal to those professionals who worked tirelessly on the 1991 Guide. Besides being placed in an electronic format, this guide includes references to and use of the National Standards for Technological Literacy: Content for the Study of Technology, the ITEA-CATTS curriculum projects, and crosswalk to the Missouri Show-Me Standards.

The following individuals provided the review and feedback for the revised Missouri Technology Education Guide 2002. For that we, the project staff, are eternally grateful:

Missouri Technology Education Guide
Revision Advisory Committee Members

Dan Busekrus
Technology Education Teacher
Troy Buchanan High School
Troy, Missouri

Jerry Foerschler
Technology Education Teacher
Harrisonville High School
Harrisonville, Missouri

James Kyd
Electronics Technology
Columbia Area Career Center
Columbia, Missouri

Dr. Jerry Richter, Professor of Graphics
Department of Graphics
College of Applied Sciences & Technology
Central Missouri State University
Warrensburg, Missouri

Mark Arnold
Technology Education Teacher
Thayer High School
Thayer, Missouri

Dr. Mark Doss
Director of Curriculum
Ozark School District
Ozark, Missouri

Dr. Ibrahim Khaleel
Technology Education Teacher
Oakland Junior High School
Columbia, Missouri

John Petsch
Supervisor/Facilitator, Technology Education
St. Louis Public Schools
St. Louis, Missouri

Nancy Sellers
Technology Education Teacher
Sedalia Middle School
Sedalia, Missouri

Project Staff:
Dr. Michael Wright, Co-Director
Benny K. Yates, Co-Director
Tina Brant, Administrative Assistant
Jeff Campbell, Digital Media Editor
Jack Varnedoe, Editing Assistant
Department of Career & Technology Education
College of Applied Sciences & Technology
Central Missouri State University

Project Monitor:
W. Douglas Miller
Technology Education Supervisor
Division of Vocation and Adult Education

Missouri Department of Elementary & Secondary Education
